

CHALK

INSTRUCTIONS

- Step 1: Pour 7 scoops of water into a disposable container.
- Step 2: Pour 10 scoops of casting material into the disposable container.
- Step 3: Pour the contents of one paint pot into the disposable container.
- Step 3: Stir the mixture with a spoon or mixing stick until there are no lumps (about 1 1/2 minutes).
- Step 4: Tap the container on the table several times to remove any air bubbles.
- Step 5: Pour the mixture into the molds and let dry for 60 minutes.

WARNING: Do not pour excess casting material into the drain or toilet bowl. Dispose of excess casting material in the garbage. If you use a spoon for mixing, wash spoon immediately after pouring the material.

- Step 6: Remove casted pieces by carefully turning the mold upsidedown onto the table and gently tapping on the back of the mold tray.
- Step 7: Let casts air dry for at least 1 hour before using.

Items Needed: Disposable mixing cup, spoon or mixing stick.

Items Included: Casting material, mold tray, paints, measuring scoop and instruction sheet.
